MAP REPORT

Delivery access review

Operations management / 20/11/2026

Executive summary

Repairs affected one delivery entrance. Reception remained open to confirm arrival slots, and booked vehicles could wait in the designated holding area.

Red marks the closure, blue marks reception and green marks the holding area.

Assessment

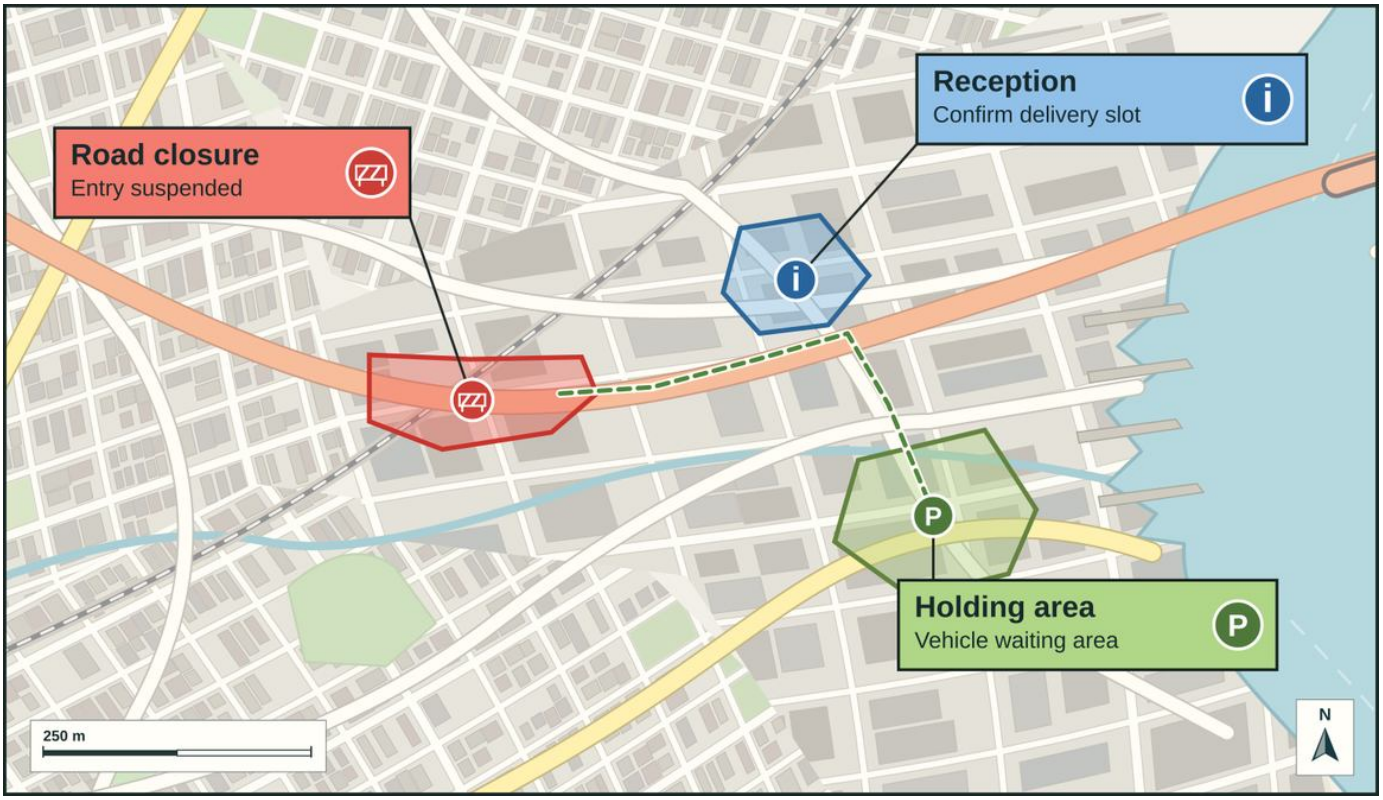

The maintenance notice identifies the entrance under repair. A separate weather notice describes standing water across a wider area. It gives no basis for marking other entrances as closed.

> MANAGEMENT DECISION
> Keep reception as the point of contact for delivery slots until the site team confirms reopening.

MAP REPORT / DETAIL

Delivery access detail

Shift handover / 20/11/2026

The dashed green line marks the access section under review.

Handover

Reception records the next update from the site team. Dispatch checks the appointment before releasing a vehicle and records any change to its delivery time.

What the map supports

The three callouts give both shifts common reference points. The line identifies the section being reviewed. The site team will confirm when vehicles can use it.

> **NEXT REVIEW**
> The duty coordinator checks the site notice and reception log at shift handover.
